

BLACK RMS RIBBON

Print on PLA/WOOD Cards

The Black RMS (Resin Multi Surfaces) monochrome ribbon is dedicated to print on specific material PLA (Polylactic acid)/WOOD cards.

ADVANTAGES

The special ink formulation and ribbon structure allow printing all type of barcodes, text and logos on special surfaces such as cards in PLA/WOOD.

Thanks to the ribbon saver feature, available with continuous ribbons, you significantly increase the number of cards to be printed with one single ribbon. Indeed, the surface used on the ribbon corresponds to the real printed surface plus a 7 mm (0.27") jump and not the surface of a whole card.

Tested and validated by Evolis R&D and Quality departments, these consumables bring you printing quality and reliability.
